## MULTI POLYESTER MEMBRANE

### Description

Multi Polyester membrane is a non-woven, polyester membrane that provides excellent strength and durability.

### Advantages

- Compatible with acrylic and bitumen waterproof coatings.
- High adhesion of acrylic resin to polyester fibres.
- Controlled mass per unit area.
- Ability to form a continuous fully bonded membrane over complex shapes.
- Multi directional tensile strength (this gives the system good mechanical properties and resistance to impact and fatigue).
- High tear strength.
- Good extensibility.
- Good elasticity.
- High conformability.
- Excellent wet ability and saturation properties.
- Only one type of fibre – polyester which is rot proof.
- Excellent weathering properties.

### Typical Properties

Mass per unit area : 80 g/m<sup>2</sup>

Blend : 100% polyester

Stitch length : 2.8 mm

### Packaging

Roll lengths : 50 m  
 Strip lengths : 50 m  
 Strip widths: 100mm,150mm, 200mm,  
 300 mm, 1m

### Quality Assurance

Multi Construction Chemicals production and testing programmes comply with local and international testing standards.
